

eir.

Aurora

The radiant eir Aurora fire table reinvents the traditional fire pit with its understated, but distinct elongated design. Positioned as the focal point of a generous seating arrangement or as a dramatic divider between zones in larger open-air settings, the languid profile sets the scene for remarkable moments.

eir.

eir fire tables come in three organic colours enhanced by your choice of natural stones, and may be outfitted with an optional tempered glass wind guard. A powder-coated aluminum top (sold separately) transforms the rectangular fire source into a contemporary styled table for all-day and all-season use.
